

Idea Generator

Here is your Idea Generator – our version of a traditional paper fortune teller. This one is filled with imaginative ideas to inspire your pupils to create their very own creature.

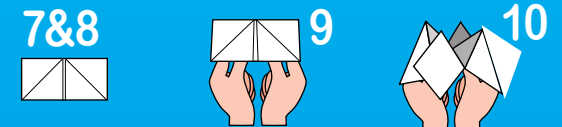

Folding The Idea Generator

1. Fold two opposite diagonal corners together, then open back up.
2. Fold the other two corners together, then open back up.
3. Turn the colour printed paper side down. Fold all four corners to the centre of the paper.

4. When all four corners are folded, it should look like this!
5. Flip the paper over then fold the corners into the centre again.
6. When all four corners are folded, it should look like this!

7. Fold two sides together ensuring the numbers are on the inside, then open back up.
8. Fold the other side together.
9. Slide your thumbs and index fingers under the four flaps.
10. Rotate your hands bringing your thumbs and index fingers together. The Idea Generator will then expand and the numbers will disappear inside.

How To Use

1. A pupil picks a colour for their creature.
2. Spell out the colour while you open the Idea Generator back and forth.
3. Next they need to pick a feature for their creature. Open and close the Idea Generator, counting out the number of the chosen feature.
4. Have them pick a second feature, and count it out again.
5. Finally pick a third feature, and lift the flap to reveal what their creature gets up to.

They now have a colour and three features of their crazy creature and an idea for their story!
